Art Unit: 3723

1. Claims 24- are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Lines 14-20 of claim 24 are not understood in view of the narrative and operational language.

In claim 24, lines 17-18, "the fixed shank end" lacks antecedent basis. In line 19, "the remaining element" lacks antecedent basis.

In line 29, the alternative phraseology "the stop or the retaining element" is vague and confusing since claim 24 defines a stop formed by the retaining element.

In claim 41, it is not clear if applicant is defining an additional stop or if "a stop" actually refers to the previously defined stop in claim 24.

In claim 42, "the actuating sleeve" lacks antecedent basis.

In claim 41, it is not clear if applicant is further defining the "retaining element" and the "releasable holding means" or if the blocking ball and latching ball are additional retaining/holding elements.

In claims 44 and 46, applicant defines "a bush" which defines the cavity. However, claim 39 defines "a tube which receives the shank". It is not clear if applicant is further defining the bush or if the tube is an additional element. Note that the claim terminology must remain consistent.

Art Unit: 3723

2. Claims 24-47 may be given favorable consideration if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
